Welcome to our Project

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

Project type:
Collaborative research project

Funding scheme:
European commission's seventh framework programme

Start date:
1st January 2010

End date:
31st December 2010

Coordinator:
Institute for Advance Study, Pavia

Grant Agreement no
244549

EU Contribution
1,341,533,00 €

Cordis SSH:

Objective & mission

eu4seas focuses on the evolution of Global Production Networks (GPNs) into Global Innovation Networks (GINs) and the impact this new process of global capitalism has on knowledge-intensive activities in the EU. The project moves beyond traditional studies of the global location of productive activities. It focuses on a much more recent trend, namely the global location of innovation or knowledge intense activities. This global shift has greater implications for the EU than the well-known relocation of production to other geographical areas. This is because it refers to the main factor underlying competitiveness, growth performance and employment in the globalised learning economy, i.e. knowledge.

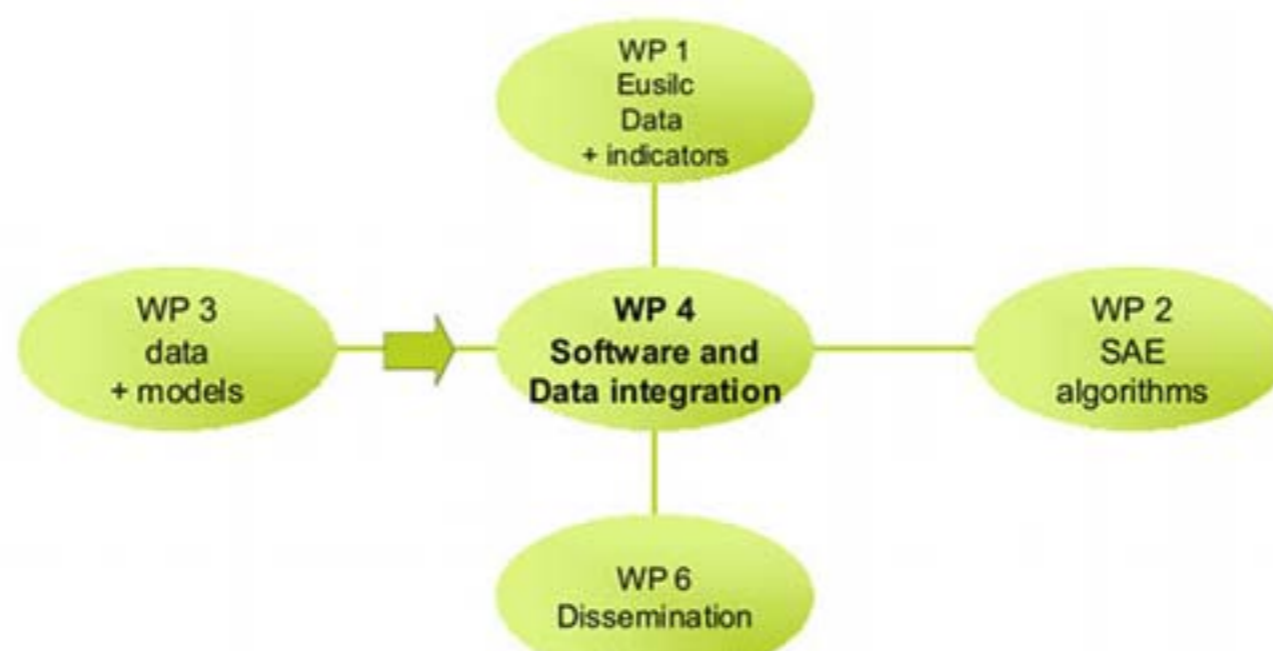

The **eu4seas** research is structured in 3 sections, each one identifying a core objective:

- Section 1: Transition of Global Production Networks Production Networks (GPNs) to Global Innovation Networks (GINs)
- Section 2: Evolving local capabilities
- Section 3: Impact and policy

Based on a combination of different methods and a wide industrial (WP2)

- To understand the scope and the determinants of the transition from global production networks to global knowledge and innovation networks at national, regional and firm level (WP3, WP4, WP5)
- To shed light on the microeconomic and systemic dimensions of technological learning, upgrading and globalisation (WP6 and WP7).
- To evaluate the long-run costs and benefits of emerging global innovation networks
